AREAS OF EXPERTISE

Programming Languages: TypeScript, Python, Go, Java, Scala, SQL, R, C#
Frameworks & Libraries: Next.js, React.js, TailwindCSS, PostgreSQL, gRPC, Django, Nx
Development Tools: Kubernetes, Helm, Skaffold, ArgoCD, SendGrid, GitHub, Jira, ClaudeAI, Azure DevOps
Spoken Languages: Romanian (native), English (C1), Dutch (A1), German (A2)

EXPERIENCE

Allseas Engineering

Sep 2025 - Present

Software Engineer

Delft, The Netherlands

- Led the architecture, development and **Kubernetes** deployment of a data-intensive fullstack application, utilizing **Go**, **TypeScript**, and **gRPC**, within a **Domain-Driven Design** framework.
- Modernized and maintained a distributed **.NET** and **Angular** web system that digitalizes operational log-keeping, ensuring legal and maritime compliance for vessel crews, while enhancing operation control through data-driven decision-making.
- Orchestrated cross-functional deployment workflows and facilitated technical inter-team communication, successfully aligning engineering dependencies and managing enterprise stakeholder expectations.
- Directed the maintenance, refactoring and expansion of a portfolio of **8** applications in an **Nx** monorepo setup, balancing feature delivery, bug resolution, and long-term maintainability in close collaboration with key stakeholders.

Feedback-Analytics

Apr 2022 - Oct 2025

Software Development Engineer

Den Haag, The Netherlands

- Architected a **Next.js** web system utilizing **Google Cloud** Task Queues and **SendGrid** to automate customer workflows and deliver analytics to **12 enterprise clients**, reducing manual workload by **35%** and customer turnover by **18%**.
- Designed scalable backend services on **Vercel** and **NeonDB** supporting **100k concurrent entries**, seamlessly integrating third-party APIs including **Salesforce**, **EasyFlex**, and **AWS S3**.
- Delivered end-to-end development for **5** software projects, such as automated customer journey workflows and custom satisfaction from gathering requirements from **12** stakeholders to deploying full-stack solutions impacting **20,000 users**.
- Facilitated the onboarding of **6** new clients, enhanced **stakeholder relationships**, and improved **development** and **internal planning efficiency** by **28%**.

Delft University of Technology | Leiden University

Sep 2022 - Feb 2024

Teaching Assistant & Student Developer

Randstadt, The Netherlands

- Mentored **350 students** across 6 bachelor and 2 minor courses, coordinated **8 student teams** during their first industry projects involving company stakeholders; contributed to **teaching** and **grading** coursework.
- Implemented an **LLM grading assistant** in **Python** capable of evaluating **100** student assignments, with **82% accuracy**.

EDUCATION

MSc in Business Information Management - Erasmus University Rotterdam

Sep 2024 - Jul 2025

- Graduated with **Cum Laude - GPA: 8.7/10**, specializing in Data Science and Analytics.
- Awarded a **8.5/10** for the Master Thesis on **Automated High-Frequency Trading for Cryptocurrency Derivatives**.
- Integrated strategic IT perspectives and digital transformation to develop more efficient software solutions focused on **data-driven** and **business-oriented** decision-making.
- **Coursework:** Web Mining & Analytics, Big Data Management & Business Analytics, Information Strategy.

BSc in Computer Science & Engineering - Delft University of Technology

Sep 2020 - Jul 2023

- **GPA: 8.0/10**, with specialization in Data Processing, Mining and Analytics.
- Awarded a **9.0/10** for the [Bachelor Thesis](#) with the **Pattern Recognition & Bio-Informatics Research Group**.
- **Minor** in Business Administration & Innovation for technology-driven companies, at *Leiden University*.
- **Coursework:** Big Data Processing, Software Engineering Methods, Algorithms & Data Structures, Functional Programming

PROJECTS

- **Jumbo AI Recipe Generator:** Leveraged the OpenAI API (ChatGPT 4.0-mini) to build a generation tool for Jumbo Supermarkten, creating recipes from incomplete ingredient lists in under 5 seconds and integrating with the webshop cart.
- **HFTBacktest Contributor:** Contributed code to an open-sourced framework dedicated to testing and validating automated high-frequency trading strategies, using historical data.
- **Port Transition Challenge (Gemeente Rotterdam):** Proposed an actionable, data-backed plan to achieve resource sustainability and circularity in the Port of Rotterdam by 2050.
- **Business Game Challenge Winner:** Won the Erasmus Center for Entrepreneurship competition with an original startup concept (PitchIt).
